

	<p>If a quadrilateral is inscribed in a circle, then its opposite angles are <u>Supplementary</u>.</p> <p><u><math>m\angle A + m\angle C = 180^\circ</math></u> and <u><math>m\angle B + m\angle D = 180^\circ</math></u></p>
--	---

Directions: Solve for each value or measure.

<p>1.</p> <p> <math>m\angle V = \underline{\hspace{2cm}}</math>  <math>m\angle W = \underline{\hspace{2cm}}</math>  <math>m\angle X = \underline{\hspace{2cm}}</math> </p>	<p>2.</p> <p> <math>m\angle A = \underline{\hspace{2cm}}</math>  <math>m\angle B = \underline{\hspace{2cm}}</math>  <math>m\angle C = \underline{\hspace{2cm}}</math>  <math>m\angle D = \underline{\hspace{2cm}}</math> </p>
<p>3. Solve for x.</p>	
<p>4. Solve for x.</p>
